Subject: **Draft Initial Site Assessment**
1075 Francisco Boulevard East
San Rafael, California

Dear Mr. O'Keefe:

Crawford & Associates, Inc. has prepared this draft Environmental Site Assessment (ESA) for property located at 1075 Francisco Boulevard East in San Rafael, California. It is our understanding that this ESA was prepared in support of Marin Transit's potential future acquisition of this property. The purpose of this report is to identify and provide a preliminary assessment of potential impacts of known or potential Recognized Environmental Conditions within the study area. This work was performed in accordance with Task Order #7 between Mark Thomas & Company, Inc. and Crawford dated July 23, 2024. We will prepare a final version of this report after receiving review comments.

We appreciate the opportunity to be on your team for the 1075 Francisco Boulevard East Property Evaluation Support project. Please call us if you have questions or comments.

Sincerely,

CRAWFORD & ASSOCIATES, INC.

1 EXECUTIVE SUMMARY

Crawford & Associates, Inc. (Crawford) performed a Phase 1 Environmental Site Assessment (ESA) for the target property located at 1075 Francisco Boulevard in San Rafael, Marin County, California (Marin County APN 009-191-037 and 009-191-038, the target property). The purpose of this ESA is to identify if current or past uses of the target property, or any nearby properties, have impacted, or have potentially impacted, the target property.

Crawford completed the following tasks to prepare this ESA report:

- Reviewed geologic and hydrogeologic conditions in the target property vicinity.
- Reviewed historical aerial photographs, topographic maps, and city directories for the target property and vicinity for indications past land uses, and for potential sources of contamination.
- Contracted with Environmental Risk Information Services (ERIS) to review readily ascertainable federal, state, local, and tribal environmental regulatory agency databases to determine whether areas of environmental concern exist in or near the target property. These records were reviewed for indications of the use, misuse, or storage of hazardous and/or potentially hazardous substances on or near the target property.
- Reviewed the following online databases for additional information regarding potential environmental conditions in the target property vicinity:
 - California Department of Environmental Protection's (CalEPA) Regulated Site Portal.
 - California State Water Resources Control Board's GeoTracker website;
 - California Department of Toxic Substances Control's EnviroStor website;
 - California Department of Resources Recycling and Recovery's Solid Waste Information System (SWIS) website;
 - California Department of Conservation, Geologic Energy Management Division's Well Finder website; and
 - California Geological Survey's (CGS) Mines Online website.
- Conducted a limited reconnaissance of the target property and vicinity on August 9, 2024.

Based on these efforts, we make the following findings.

- Previous development of this property includes use as an auto dealership, including service bays. Discharge of petroleum hydrocarbons from a waste oil tank and hydraulic lifts was documented at the target property. This discharge was cleaned up and a No Further Action Required (NFAR) letter for this investigation was issued May 12, 2006 (this constitutes a Historical Recognized Environmental Condition [HREC]). No Recognized Environmental Conditions (RECs) or Controlled Recognized Environmental Conditions (CRECs) were identified at the target property.
- It appears unlikely that adjacent or nearby properties have impacted the target property.
- Our review of geologic and hydrogeologic conditions in the target property vicinity did not identify any geologic hazards likely to impact the target property.
- About 25,000 yd³ of imported soil has been placed on the southern parcel of the target property surcharging the site (APN 009-191-37). Analytical screening data provided for this soil appears to indicate that this imported material is unlikely to have contaminated the target property.
- About 1,000 yd³ of soil has been placed on the northern parcel (APN 009-191-38). This material appears unrelated to surcharge material. The source of this import is unknown. No documentation demonstrating chemical screening of this soil has been provided.

- The ERIS records review identified eleven sites/facilities from various regulatory lists adjacent to the target property. Three of these sites are leaking underground storage tank cleanup sites. NFAR letters have been issued for all three sites (HRECs). It appears unlikely these sites have impacted the target property.
- The ERIS records review identified eight sites/facilities they could not map due to missing or incomplete address information. Crawford was able to determine that none of these site/facilities are adjacent to the target property, and that none of these sites/facilities appear unlikely to have impacted the target property.

Based on the information obtained during this study Crawford makes the following recommendations.

- Due to the unknowns associated with the stockpiled material on the northern parcel Crawford recommends additional testing and the stockpiled material be removed.

This report identifies general hazardous materials issues that may be present at the site, and provides recommendations for further investigation, as warranted. Additional research and assessment may provide more certainty on conditions to be encountered during site progression.

2 INTRODUCTION

2.1 PURPOSE

The following report summarizes a Phase 1 ESA performed by Crawford for the target property located at 1075 Francisco Boulevard East in San Rafael, Marin County, California. This ESA was prepared for use by Marin Transit for this specific project in accordance with Task Order #7 between Mark Thomas & Company, Inc. and Crawford dated July 23, 2024. The purpose of this ESA is to help identify if current or past uses of the target property, or nearby properties, impacted, or had the potential to have impacted, the target property with hazardous substances or petroleum products. This ESA was conducted in accordance with ASTM Standard E1527-21; deviations from this standard are noted in the text below. Site maps are included in Appendix A.

We use the term Recognized Environmental Condition (REC) consistent with ASTM E1527-21, which defines REC as:

“(1) the presence of hazardous substances or petroleum products in, on, or at the subject property due to a release to the environment; (2) the likely presence of hazardous substances or petroleum products in, on, or at the subject property due to a release or likely release to the environment; or (3) the presence of hazardous substances or petroleum products in, on, or at the subject property under conditions that pose a material threat of a future release to the environment. A de minimis condition is not a recognized environmental condition.”

ASTM defines a controlled REC (CREC) as *“a REC affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities with hazardous substances or petroleum products allowed to remain in place subject to implementation of required controls.”*

ASTM defines a historical REC (HREC) as *“a previous release of hazardous substances or petroleum products affecting the subject property that has been addressed to the satisfaction of the applicable regulatory authority or authorities and meeting unrestricted use criteria established*

by the applicable regulatory authority or authorities without subjecting the property to any controls.” An HREC is not considered a REC.

ASTM defines a de minimis condition as “a condition related to a release that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.” A condition determined to be a de minimis condition is not a REC or a CREC.

2.2 SCOPE OF SERVICES

Crawford completed the following tasks to prepare this ISA.

- Reviewed geologic and hydrogeologic conditions in the target property vicinity.
- Reviewed historical aerial photographs and topographic maps of the target property and vicinity for indications of past land uses, and for potential sources of contamination.
- Contracted with ERIS to review federal, state, local, and tribal regulatory agency databases to determine whether areas of environmental concern exist on or near the target property. Records identified by ERIS were reviewed for indications of the use, misuse, or storage of hazardous and/or potentially hazardous substances on or near the target property.
- Reviewed the following online databases for additional information regarding environmental conditions associated with the target property and vicinity:
 - California Department of Environmental Protection’s (CalEPA) Regulated Site Portal.
 - California State Water Resources Control Board’s GeoTracker website;
 - California Department of Toxic Substances Control’s EnviroStor website;
 - California Department of Resources Recycling and Recovery’s Solid Waste Information System (SWIS) website;
 - California Department of Conservation, Geologic Energy Management Division’s Well Finder website; and
 - California Geological Survey’s (CGS) Mines Online website.
- Conducted a limited site reconnaissance of the target property and vicinity.

2.3 PROJECT DESCRIPTION

It is our understanding that Marin Transit is evaluating acquisition of the target property in anticipation of consolidating mass transit operations in the San Rafael area. We further understand that specific property redevelopment plans have not been developed at this time.

2.4 PROJECT LOCATION

The target property comprises Marin County APN 009-191-037 and APN 009-191-038, which is located at 1075 Francisco Boulevard East in San Rafael, on the southeast corner of the Francisco Boulevard and Castro Avenue intersection. The property is located at about latitude 37.9590°N and longitude of 122.5032°W (per Google Earth). Maps showing the target property and near vicinity are included as Figures 1 and 2 in Appendix A.

2.5 GEOLOGIC CONDITIONS

The target property lies within the Coast Ranges¹. The Coast Ranges are northwest-trending series of mountain ranges and valleys, subparallel to the San Andreas Fault, bounded to the east by the alluvium of the Great Valley and to the west by the Pacific Ocean. The Coast Ranges are composed of thick Mesozoic and Cenozoic sedimentary strata. The northern and southern ranges are separated by a depression containing the San Francisco Bay. The northern Coast Ranges are dominated by irregular, knobby, landslide-topography of the Franciscan Complex. The eastern border is characterized by strike-ridges and valleys in Upper Mesozoic strata. In several areas, Franciscan rocks are overlain by volcanic cones and flows of the Quien Sabe, Sonoma and Clear Lake volcanic fields.

Published geologic mapping² shows the site as underlain by artificial fill over Quaternary age marine and marsh deposits (Qmf), described as mud, including much organic material, silty mud, silt, and sand; very soft to soft when wet. A geologic map of the site vicinity is included as Figure 3 in Appendix A. Serpentine or ultramafic rocks have not been identified within a mile of the target property³ and are not indicated on the geologic map. Serpentine or ultramafic rocks likely to contain naturally occurring asbestos (NOA) were not observed at the target property or in the immediate vicinity during reconnaissance.

The site is not located within an Alquist-Priolo Earthquake Fault Zone⁴. Evidence of faulting, springs, seeps, or landslides was not observed within or immediately adjacent to the target property during reconnaissance. Based on mapping from the California Geological Survey⁵, the nearest Quaternary age faults include the Hayward Fault (about 8 miles to the northeast; last movement 1886) and the San Andreas Fault (about 10 miles to the southwest; last movement 1906). Regional fault activity is shown on Figure 4.

Soil beneath the target property is mapped⁶ as Xerorthents-fill. Soil information is summarized in Table 1.

Table 1. Summary of Selected Soil Characteristics

Soil name	Description	Parent material
Xerorthents-fill	Soils devoid of weatherable minerals, arid or desert-like conditions	Earth spread deposits derived from igneous, metamorphic, and sedimentary rock

⁶ U.S. Natural Resources Conservation Service, Web Soil Survey, <http://websoilsurvey.nrcs.usda.gov/>, accessed August 21, 2024.

2.6 HYDROGEOLOGIC CONDITIONS

Historical groundwater data was available from several nearby sites identified on the GeoTracker website⁷. These data suggest that historically groundwater was generally encountered between about 5 and 10 feet below ground surface, and that this shallow groundwater generally flowed toward the northwest.

The target property is included on Federal Emergency Management Agency's Flood Insurance Rate Map 06041C0459F (dated March 16, 2016). The target property is mapped within a special flood hazard area (Zone AE), with a base flood elevation of 10 feet.

The target property is within the San Francisco Bay Area tsunami hazard area⁸.

3 HISTORICAL RECORDS REVIEW

3.1 HISTORICAL LAND USE

The target property and vicinity were undeveloped wetland or bay tidal flats until the early 1970s, when the area was developed for commercial and light industrial use. Property uses do not appear to have changed substantively since initially being developed in the 1970s.

3.1.1 AERIAL PHOTOGRAPHS

Historical aerial photographs were provided by ERIS for the years shown in Table 2. The photographs were reviewed for information about historical conditions and land uses near the target property. Conditions depicted in the photos are discussed below. The ERIS Historical Aerials report (dated July 30, 2024) is included in Appendix B.

Explanation:

Cartwright = Cartwright Aerial Surveys

Maxar = Maxar Technologies

USDA = U.S. Department of Agriculture

USGS = U.S. Geological Survey

1946 - 1958 The target property and land in the vicinity is undeveloped, with State Route (SR) 17 adjacent to the southwest side of the target property as a 2-lane highway (SR 17 was renumbered as Interstate 580[I-580] in 1984). A drainage canal runs through the target property from SR 17 to the north-northwest. What appears to become Castro Avenue runs adjacent to the western edge of the target property, heading north from SR 17 to some non-residential development and an airfield.

1965 Light industrial development is encroaching from the northwest; some adjacent properties are being developed. The drainage canal has been re-oriented to run along the eastern side of the target property in its current location and configuration. SR 17 has become a 4-lane freeway. Francisco Boulevard and Castro Avenue appear in their current locations and configurations. The target property appears undeveloped. The airfield property appears to have been redeveloped.

1974 – 1993 The target property appears to be developed as an automotive dealership. Adjacent properties appear to be under development for light industrial uses. All properties in vicinity appear fully developed for light industrial uses starting in the 1982 photograph.

2005 - 2022 The target property is undeveloped and appears to be unpaved from the 2005 through 2014 photographs, then used for automobile storage in the 2016 through 2020 photographs, then vacant and unused/undeveloped in the 2022 photograph. Adjacent property development appears unchanged during this period.

3.1.2 TOPOGRAPHIC MAPS

Historical topographic maps were provided by ERIS for the years shown in Table 3. Maps were reviewed for significant changes in topography or property improvements. The ERIS Topographic Maps report (dated July 28, 2024) is included in Appendix C.

Table 3: Historical Topographic Maps

Year	Quadrangle(s)	Series	Scale
1897	Tamalpais, CA	15-Minute	1:62,500
1940	Tamalpais, CA	15-Minute	1:62,500

File: 17-362.9.1

Year	Quadrangle(s)	Series	Scale
1954	San Rafael, CA	7.5-Minute	124,000
1968	San Rafael, CA	7.5-Minute	1:24,000
1980	San Rafael, CA San Quentin, CA	7.5-Minute	1:24,000
1995	San Rafael, CA San Quentin, CA	7.5-Minute	1:24,000
1996	San Rafael, CA San Quentin, CA	7.5-Minute	1:24,000
2015	San Rafael, CA San Quentin, CA	7.5-Minute	1:24,000
2018	San Rafael, CA San Quentin, CA	7.5-Minute	1:24,000
2021	San Rafael, CA San Quentin, CA	7.5-Minute	1:24,000

1895 - 1968 Target property is depicted within marshy tidal flats of the San Francisco Bay margin during this period. The drainage canal and Castro Avenue first appear on the 1941 map, and the San Francisco Bay Airfield and surrounding light industrial development (north-northwest of the target property) is first depicted on the 1951 map. The airfield is no longer depicted starting with the 1968 map, which also depicts urban development encroaching from the northwest.

1995 - 2021 Target property and adjacent properties are depicted as developed starting with the 1980 map. Drainage canal, Castro Avenue, Francisco Boulevard, and Kerner Boulevard (to the northeast) are depicted in their current configurations and locations. Starting with the 1995 map buildings and other cultural features (except roads) are not depicted on the map; target property and surrounding properties are shaded to denote urban development.

3.1.3 CITY DIRECTORY REPORT

ERIS provided listings for properties adjacent to the target property in the sources listed in Table 4. A summary of the types of commercial development identified in the city directories is included in Table 5. ERIS's City Directory report (dated July 31, 2024) is included in Appendix D.

Table 4. City Directory Sources

Source	Years
Digital Business Directory	2003, 2008, 2012, 2016, 2020, 2022
Haines	1972, 1975, 1981, 1985, 1990, 1995, 2000
A To Z Directory	1953, 1955

From 1975 to 2000, and again in 2016, the target property is listed in the above directories under several names, all apparently related to automotive sales (and presumably service): Francisco Dodge, Francisco Motors, Commonwealth Leasing, San Rafael Chrysler, and Marin Dodge. No listings were identified for the target property in 2003 through 2012, or 2018 through 2022,

corresponding with the period of time the target property was vacant or appeared to be used for automotive storage in the aerial photographs (Section 3.1.1).

Based on the directories listed in Table 4 properties in the project site vicinity appear to have been used for a variety of commercial, distribution, wholesale, and automotive purposes.

3.1.4 FIRE INSURANCE MAPS

ERIS reported that fire insurance map coverage was not available for the target property and vicinity.

4 DATABASE SEARCH AND RECORDS REVIEW

4.1 DATABASE SEARCH

Reasonably available databases and site lists maintained by environmental regulatory agencies were searched for properties within the study area to identify sites with known releases of hazardous materials or petroleum products, and sites with the potential for such releases. Each of the lists and databases was searched for facilities within the ASTM approximate minimum search distance relative to the target property; search distances ranged between $\frac{1}{8}$ and one mile from the target property, depending on the database. Refer to the ERIS Database Report (dated July 29, 2024) in Appendix E for descriptions of the databases and lists searched, the associated search radius, dates the information was obtained, and maps showing locations of the facilities identified below.

4.2 SUMMARY OF RECORDS SEARCH

4.2.1 TARGET PROPERTY

ERIS identified 17 records for the target property from eight of the databases reviewed. These are summarized in Table 5 below.

Table 5. Summary of Records Identified In Target Property

ERIS Map ID	Site Name and Address	Database(s)	Comments
1	Marin Dodge, San Rafael Chrysler Dodge, Warren Services, John Irish Auto Plaza, Chrysler Realty Corp 1075 Francisco Boulevard East	LUST, HHSS, HIST TNK, CUPA MARIN, FINDS/FRS, HAZNET, HAZ GEN, HIST MANIFEST Leaking Underground Storage Tank (LUST) Cleanup Site – Closed 5/12/2006 (HREC)	A leaking waste oil tank was removed in March 1987, and all facilities (including nine in-ground hydraulic hoists) were removed in 1995 and 1996. Soil and groundwater impacts were identified, primary pollutants identified included diesel-range and oil-range petroleum hydrocarbons and polychlorinated biphenyls (PCBs). Remediation included removal of 1,695 tons of soil and 2,450 gallons of groundwater, along with natural attenuation.

This site was previously used for automotive sales and service. A release of petroleum hydrocarbons and PCBs (waste oil tank and hydraulic lifts) was identified at this site; however, the environmental investigation and remediation case was closed. A No Further Action Required (NFAR) letter was issued May 12, 2006, closing the site with no restrictions.

4.2.2 RECORDS FOR ADJACENT PROPERTIES

ERIS identified records for twelve sites/facilities that appear to be located adjacent to the target property (Table 6). Three of the sites are regulated cleanup sites.

Table 6. Summary of Records Identified Adjacent to Target Property

ERIS Map ID	Site Name and Address	Database(s)	Comments
2	Castro & Francisco	HAZNET, HIST MANIFEST	No indication of a hazardous materials released to the environment.
3	San Rafael Sanitation District	PFAS IND	No indication of a hazardous materials released to the environment.

DRAFT INITIAL SITE ASSESSMENT

1075 Francisco Boulevard East
San Rafael, California

September 5, 2024

File: 17-362.9.1

ERIS Map ID	Site Name and Address	Database(s)	Comments
4	3241 Kerner Boulevard	LUST, CUPA MARIN, DELISTED TNK, HHSS, CERS HAZ, EMISSIONS, HIST TANK, RCRA NON GEN, RCRA TSD, HAZ GEN, DELISTED HAZ, HIST MANIFEST, HAZNET, FINDS/FRS LUST Cleanup Site – Closed July 9, 1998 (HREC)	Various automotive shops at this location. Leaking UST and oil/water separator at transmission shop, removed in 1988. Transmission fluid and other wastes released.
5	999 Francisco Boulevard	RCRA SQG, FINDS/FRS, HAZNET	No indication of a hazardous materials released to the environment.
6	1101 Francisco Boulevard	HAZNET	No indication of a hazardous materials released to the environment.
7	De Maestri Distributing Grainers 3195 Kerner Boulevard	LUST, FINDS/FRS, HAZNET, HIST MANIFEST, DE;OSTED HAZ, CUPA MARIN, RCRA NON GEN, UST SWEEPS, HAZ GEN LUST Cleanup Site – Closed 12/30/1993 (HREC)	Waste oil UST and hydraulic lift removed in 1991.
8	1105 Francisco Boulevard	HAZNET, HIST MANIFEST, RCRA NON GEN, CUPA MARIN, FINDS/FRS, HAZ GEN, RCRA SQG	Automotive operation, no indication of a hazardous materials released to the environment.
9	30 Castro Avenue	FINDS/FRS, HAZNET, CUPA MARIN, RCRA NON GEN, HAZ GEN	Automotive operation, no indication of a hazardous materials or petroleum products released to the environment.
10	3210 Kerner Boulevard	RCRA NON GEN	No indication of a hazardous materials released to the environment.
11	990 Francisco Boulevard	FINDS/FRS, LUST, HHSS LUST Cleanup Site – Closed July 3, 2012 (HREC)	Former carwash and service station. USTs removed in 1986.
12	Lucas Film Ltd LLC Lucas Digital Ltd Industrial Light and Magic 3160 Kerner Boulevard	RCRA SQG, EMISSIONS, CUPA MARIN	No indication of a hazardous materials released to the environment.

Three sites adjacent to the target property have a history of discharge to the environment (leaking underground storage tanks [USTs]). All three of these sites have been closed and NFAR letters issued (unrestricted use). It appears unlikely these sites had impacted the target property.

4.2.3 OTHER RECORDS

Based on the locations of other sites identified in the ERIS report relative to the target property and the information contained in the information contained in the ERIS records, none of the other sites included in the ERIS report appear likely to have impacted the target property.

4.2.4 UNMAPPABLE FACILITIES

ERIS identified thirteen records from eight databases they could not map due to limited or incomplete address information (Table 8).

Table 7. Summary of Unplottable Records

Site Name and Listed Location	Database(s)	Comments
Bellam Boulevard Landfill End of Bellam Boulevard	CALSITES, WMUD	This location appears to be at least about 1,500 feet northeast of the target property. Impact to target property appears unlikely.
NRC Francisco Boulevard	CHIMERS	Report of restaurant workers dumping cooking oil in the Bay. Impact to target property appears unlikely.
Central Marin Sanitation Agency Anderson Drive East End	EMISSIONS	This facility is located about 3,400 feet south-southeast of the target property. Impact to target property appears unlikely.
San Rafael Rock Quarry Point San Pedro Road at McNears Point	ENVIROSTOR	This location appears to be about 3.1 miles to the northeast. Impact to target property appears unlikely.
1X Eureka Bank NE of San Francisco Blvd/SE	HAZNET, HIST MANIFEST	Based on databases cited impact to target property appears unlikely.
Kerner Blvd Pump Station Kerner Boulevard	HIST TANK	Historical records of fuel tank at the sewage pumping station. No indication of hazardous waste spills or releases. Location appears to be about 0.9- mile north of target property. Unlikely to have impacted target property.
Horst Hanf Landfill Landfill	WMUD	No indication of hazardous waste spills or releases. Location about 0.6-mile southeast of target property. Unlikely to have impacted target property.
Ghilotti Brothers Dump Site Francisco Boulevard on San Rafael B	WMUD	No indication of hazardous waste spills or releases. Location about 0.7-mile southeast of target property. Unlikely to have impacted target property.

Based on our research, none of the sites identified by ERIS as unmappable appear to be located within 1,000 feet of the target property. It appears unlikely that these unmapped sites have impacted the target property.

4.3 ADDITIONAL DATABASE SEARCHES

Crawford reviewed the Regulated Site Portal⁹, GeoTracker⁷, EnviroStor¹⁰, and SWIS¹¹ websites to identify potential suspect facilities not included in the ERIS report.

Regulated Site Portal – no sites identified except those discussed above in Section 4.2.

The target property was identified on the GeoTracker website, along with four sites within about a 500-foot radius (centered on the target property). These properties are summarized below.

- San Rafael Chrysler Dodge, 1075 Francisco Boulevard E (target property). One 550-gallon waste soil tank was removed in 1987, and nine hydraulic hoists were removed in 1995 and 1996. A soil and groundwater investigation were implemented, identifying diesel, motor oil, and PCBs as the contaminants of concern. Soil and groundwater were removed from the site, and a NFAR letter issued May 12, 2006 (**HREC**). A copy of this NFAR is included in Appendix F.
- Former car wash and service station, 990 Francisco Boulevard E (west and northwest of target property, across Francisco Boulevard). Three gasoline USTs were removed in 1986, and impact to soil and groundwater was identified. This site was investigated and remediated; impact appeared to be generally restricted to the subject property. A NFAR letter was issued July 3, 2012. This site appears to generally be cross-gradient from the target property. Impact to the target property appears unlikely.
- City of San Rafael Fire Department, Station 4, 46 Castro Avenue (north of the target property). One 550 gallon aboveground diesel tank was removed in 2002. Following limited soil excavation and sampling, a NFAR was issued October 15, 2002. Impact appeared restricted to fire station property.
- Kerner Automotive Center, 3241 Kerner Boulevard (adjacent property to northeast). A waste oil tank and oil/water separator were removed in 1989. Soil and groundwater were removed from the excavation, and samples collected at the limits of the excavation. A NFAR letter was issued June 12, 1998. Impact to the target property appears unlikely.
- De Maestri Distribution, 3195 Kerner Boulevard (adjacent property to the east). One diesel and one gasoline UST were removed in 1991. A soil and groundwater investigation was performed, and a NFAR letter issued December 30, 1993. Impact to the target property appears unlikely.

No sites were identified within 1,000 feet of the target property on the Envirostor or SWIS websites.

No natural gas, petroleum, or geothermal wells were identified within 1,000 feet of the target property on the Well Finder¹² website.

No operating or abandoned mining operations were identified within 1,000 feet of the target on the Mines Online¹³ website.

4.4 ADDITIONAL DOCUMENT

Crawford reviewed an Old Republic Preliminary Report dated January 12, 2023. This preliminary title report listed several drainage and utility easements for the property, but did not contain any indications of Activity and Use Limitations or other Environmental Liens filed against the target property.

4.5 INTERVIEWS

Owner Questionnaire – Completed by Mr. KP Patel August 12, 2024, who owned the property from 2017 to present. Mr. Patel states the property has been vacant and undeveloped during this period. He is unaware of any hazardous materials, hazardous waste, or petroleum products used, stored, or generated at the site, and states he is unaware of any previous spills or releases or any environmental cleanups at the site. Mr. Patel states the lot was filled with clean dirt in 2022 and 2023, and that the dirt was tested clean by a laboratory.

Contractor interview – Crawford spoke with Mr. Rocky Stich of Stich Construction, contractor for the property owner, on August 14, 2024. Mr. Stich stated that about 25,000 cubic yards of soil for ground surcharge on the southern parcel (APN 009-191-37) was imported by Stich Construction and Ghilotti Construction, that the material came from virgin properties in San Jose and Novato, and that this material was tested for contamination in a laboratory. Mr. Stich also reported that the stockpiled soil on the northern parcel (APN 009-191-38) was from another site and was placed there for temporarily storage when the disposal facility was closed.

Geotechnical Engineer – Crawford contacted Mr. Scott Stephens of Miller Pacific Engineering Group by email on August 14, 2024. Mr. Miller reported that at the main pad, the surcharge was about 15 feet thick, tapering to lower elevations around the edge of the surcharge pile. Mr. Miller could not provide the source of the surcharge material, or the analytical results of the testing.

Source of Surcharge Import Material – Crawford spoke with Mr. Sean Murphy of Alameda Marina, LLC, on September 3, 2024 (the immediate source of the surcharge material imported to the target property). Mr. Murphy indicated that the Alameda Marina development project imported about 43,000 yd³ of fill material from San Bruno (as indicated in the Application for Determination of Fill Material Suitability dated November 20, 2020, and that some of this import material was removed from the Alameda Marina project site for use at the San Rafael project site in late 2022.

5 SITE RECONNAISSANCE

A reconnaissance of the target property and vicinity was made on August 9, 2024, by Steve Carter, PG. The reconnaissance consisted of walking the target property and along Francisco Boulevard E, Castro Avenue, and a driving traverse of Kerner Boulevard. The reconnaissance included visual observations of the target property, roadways, properties adjacent the target property, and current conditions of the area. These observations were intended to identify the land uses and activities on adjacent properties, and the presence, or likely presence, of hazardous substances or petroleum products at the target property and on adjacent properties. Conditions observed during the site reconnaissance are discussed below.

Conditions on the Target Property

The target property is undeveloped and unpaved. Some shallow excavations and stockpiles were observed on the northern parcel (APN 009-191-38), along with several small piles of cobbles and concrete. The stockpiles were partially covered with plastic sheeting. A large, graded stockpile about 15 feet high is present on the southern parcel (APN 009-191-037); this apparently is the surcharge stockpile. Two pieces of grading/excavation equipment are parked next to the surcharge stockpile.

No ground surface staining was observed on the target property. Other than two fire extinguishers and the grading/excavation equipment, no petroleum products, hazardous materials, or hazardous wastes appeared to be stored at the site. Litter was di minimis and included a single tie at the southern corner. Water did not appear to be flowing in the concrete-lined drainage canal adjacent to the southern and eastern edges of the property.

Conditions on contiguous properties

The target property is bounded to the west by Francisco Boulevard, and to the north by Castro Avenue. Properties adjacent to the northeast side of the property appear developed for automotive repair businesses. Evidence of drainage from these properties onto the target property was not observed. Properties adjacent to the southeast (south of the canal) appeared developed for automotive repair and general contractors.

General Site Observations

During the reconnaissance, Crawford did not observe evidence of any of the following conditions within the target property or on parcels contiguous with the target property

- Piles of trash/illegal dumping (only de minimis litter observed)
- Staining of the ground surface
- Unauthorized disposal of batteries
- Medical or drug lab waste
- Mining activity
- Serpentine, ultramafic rocks, or evidence of NOA
- Drums or hazardous materials storage containers
- Unusual or suspicious odors
- Agricultural equipment
- Inaccessible or unobserved areas

Observations made during the site reconnaissance generally support the research and background data. Photographs from the site reconnaissance are provided in Appendix G.

5.1 IMPORTED FILL MATERIAL

Northern Parcel (009-191-38)

The source of the material deposited on the northern parcel by Stich Construction has not been identified, and documentation regarding the presence or absence of possible contaminants in this soil has not been provided. It is our understanding that this material is not related to the surcharge

material on the southern parcel. This stockpiled material (or the ground surface beneath it if it is removed) should be tested for possible contaminants of concern if suitable documentation cannot be provided.

Southern Parcel (APN 009-191-37)

Stich Construction reported that approximately 25,000 cubic yards (yd³) of soil for ground surcharge on the southern parcel (APN 009-191-37) was imported by Stich Construction in late 2022, under an approved Application for Determination of Fill Material Suitability (dated November 20, 2020). The source of this material was virgin land located at 811 and 901 Cherry Avenue in San Bruno, California. This fill material was originally destined for a marina and housing development project in Alameda County. Based on our conversation with the Alameda property developer, about 43,000 yd³ of fill material was imported from San Bruno to the Alameda property, and about 25,000 yd³ was later transferred to the target property in San Rafael in late 2022.

Based on the Alameda County Fill Material Suitability application package this soil was tested in place prior to excavation. A total of 98 soil samples representing about 130,000 yd³ were collected and analyzed as described below.

- Title 22 metals (EPA Methods 6010 and 7471)
- Total petroleum hydrocarbons as gasoline, diesel, and oil (EPA Method 8015B)
- Semi-volatile organic compounds (EPA Method 8270C-SIM)
- Volatile organic compounds (EPA Method 8260B)
- Polychlorinated biphenyls (PCBs, EPA Method 8082)
- Pesticides (EPA Method 8081A), and
- Asbestos (CARB 435).

Results of these analyses were compared against site specific screening criteria (based on the lowest of the Water Board soil Environmental Screening Levels for residential, construction worker, terrestrial habitat-minimally vegetated, leaching to groundwater for non-drinking water, and gross contamination as specified in the Environmental Engineering Controls Approach, Wrap A/The Launch, Alameda Marina, 1815 Clement Avenue, Alameda, California). Areas of native soil represented by analytical results that failed to meet all analytical criteria were not exported to the Alameda project.

The screening levels utilized in the original Fill Material Suitability application package appear to be appropriate for the target property. Concentrations of the chemicals of concern represented by the analytical methods listed above were all below the screening levels. It appears likely that the imported surcharge material has not negatively impacted environmental conditions at the target property. Evaluation of chemicals of concern represented by the analytical methods listed above does not appear warranted.

8 FINDINGS

The purpose of this report is to identify recognized soil or groundwater contamination or hazardous material issues that could significantly impact the target property. The assessment identified the following potential hazardous materials issues that must be considered in the planning of project improvements.

8.1 SUMMARY OF FINDINGS

Crawford reviewed geologic conditions in the target property vicinity; historical aerial photographs and topographic maps, city directories, and reasonably ascertainable public records; interviewed the property owner and his contractor; and performed a reconnaissance of the target property on August 9, 2024. Based on these efforts, we make the following findings.

- One HREC was identified at the target property (leaking waste oil UST and hydraulic lifts; case closed 5/12/2006. No RECs or CRECs were identified at the target property.
- Adjacent properties appear unlikely to have impacted the target property.
- Our review of geologic and hydrogeologic conditions in the target property vicinity did not identify any geologic hazards likely to impact the target property.
- Previous development of this property includes the use as an auto dealership, including service bays. Discharge of petroleum hydrocarbons from a waste oil tank and hydraulic lifts was documented at the target property. This discharge was cleaned up and an NFAR letter issued May 12, 2006 (no restrictions). This constitutes an HREC.
- About 25,000 yd³ of imported soil has been placed on the southern parcel (APN 009-191-37). Analytical screening data provided for this soil appears to indicate that this imported material is unlikely to contaminate the target property.
- About 1,000 yd³ of soil has been placed on the northern parcel (APN 009-191-38). This material appears unrelated to surcharge material. The source of this import is unknown. No documentation demonstrating chemical screening of this soil has been provided.
- The ERIS records review identified twelve sites/facilities from various regulatory lists adjacent to the target property. Three of these sites are leaking underground storage tank cleanup sites. NFAR letters have been issued for all three sites. It appears unlikely these sites have impacted the target property.
- The ERIS records review identified eight sites/facilities that could not be mapped due to missing or incomplete address information. Crawford was able to determine that none of these site/facilities are adjacent to the target property, and that none of these sites/facilities appear likely to have impacted the target property.

8.2 POTENTIAL HAZARDOUS MATERIALS ISSUES

A leaking underground storage tank investigation and cleanup was performed at this site. The investigation has been closed and an NFAR letter issued (no restrictions). This is an HREC, no further action with regard to this investigation appears necessary. Note that although the site investigation has been closed and an NFAR letter issued, site redevelopment may encounter some residual petroleum impact in the subsurface

Surcharge soil material placed on the southern parcel appears unlikely to impact the target property.

The source of the stockpiled soil on the northern parcel is unknown to Crawford, and no documentation has been provided regarding the presence or absence of potential contaminants in this material. Absent additional information a soil sampling program involving this material (or the underlying native material if the stockpile is removed) is warranted to verify that no impact has occurred.

8.3 GENERAL HAZARDOUS MATERIALS ISSUES

8.3.1 ASBESTOS CONTAINING MATERIAL (ACCM)

Concrete or transportation structures that might contain asbestos or asbestos containing materials were not observed at the site.

8.3.2 AERIALLY DEPOSITED LEAD (ADL)

Roadways were present adjacent to the target property during the period of leaded gasoline usage; a major freeway was present about 60 feet to the west of the target property for about 30 years of leaded gasoline usage. However, the ground surface appears to have been recently excavated or disturbed. Evaluation for aerially deposited lead concentrations that exceed hazardous waste threshold does not appear warranted.

8.3.3 LEAD-BASED PAINT

Painted transportation structures were not identified within the target property.

8.3.4 CHEMICALLY TREATED WOOD

Chemically treated wood was not observed at the target property.

8.3.5 THERMOPLASTIC TRAFFIC STRIPING

Thermoplastic striping was not observed at the target property.

8.3.6 NATURALLY OCCURRING ASBESTOS (NOA)

Evidence of naturally occurring asbestos was not observed at the target property. Naturally occurring asbestos is not mapped within at least a mile of the target property.

8.3.7 TRANSFORMERS

Overhead electrical line or pole-mounted electrical transformers were not observed in the target property vicinity. Pad-mounted transformers were not observed at the target property or on adjacent properties.

8.3.8 AGRICULTURAL CHEMICALS

Evidence for the use or storage of agricultural chemicals were not observed at the target property. Historically the target property or other properties in the vicinity have not been developed for agricultural uses.

8.3.9 PETROLEUM HYDROCARBONS

Due to the historical presence of an automobile dealership and its associated waste oil tank and in-ground hydraulic lifts, impact from petroleum hydrocarbons (diesel, oil, and PCBs) were previously identified in soil and groundwater beneath the target property. However, remedial measures were successful in cleaning up the site sufficiently to receive an NFAR letter in 2006. Further development of the target property may encounter some residual petroleum hydrocarbons from this release, but given the age of the release, the remedial effort undertaken at the site, and the concurrence from the Regional Water Quality Control Board that remedial efforts were

sufficient, we do not expect residual hydrocarbons that might still be beneath the site to be significant.

9 RECOMMENDATIONS

Based on the findings of this ISA, Crawford makes the following recommendations for additional assessment at the target property.

- Sampling of the stockpiled material on the northern parcel (or the underlying native soil if the stockpiled material is removed).

10 LIMITATIONS

This report summarizes the findings and opinions of Crawford, with regard to the potential for the presence of contamination/hazardous materials within the project area at concentrations likely to warrant mitigation under current statutes and guidelines. Findings and opinions within this report are based on information obtained on given dates, or provided by specified individuals, through record reviews, site review, and related activities. Crawford's information is only as good as the information provided by these sources. Site conditions may change after documented observations have been made. A warrant or guarantee cannot be made that hazardous materials do not exist at the site. To further reduce risk, an extensive invasive exploration may be necessary prior to project implementation.

This report was prepared for the specific use of Mark Thomas and their agents for this project and applies only to the area identified as the project area. Crawford is not responsible for interpretations by others of data presented in this report. This report does not represent a legal opinion. No warranty is expressed or implied. Conclusions in this report are based on professional judgment and experience. Work for this assessment was performed in accordance with generally accepted standards of practice in northern California at the time of this assessment.

The scope of this investigation did not include determining the presence of radon. Identifying endangered species, geologic hazards, archeological sites, or ecologically sensitive areas are also beyond the scope of this report.

The governmental records summary within this report is derived from public records, which are updated on a continual basis. For this reason, it is not advisable to use this information to base a decision after 180 days of the issue date of this report. Conditions at the site can and will change over time. Please contact Crawford to revise this report to reflect new information.

RE: CITY DIRECTORY RESEARCH
1075 Francisco Blvd E
San Rafael, CA 94901

Thank you for contacting ERIS for an City Directory Search for the site described above. Our staff has conducted a reverse listing City Directory search to determine prior occupants of the subject site and adjacent properties. We have provided the nearest addresses(s) when adjacent addresses are not listed. If we have searched a range of addresses, all addresses in that range found in the Directory are included.

Note: Reverse Listing Directories generally are focused on more highly developed areas. Newly developed areas may be covered in the more recent years, but the older directories will tend to cover only the "central" parts of the city. To complete the search, we have either utilized the ACPL, Library of Congress, State Archives, and/or a regional library or history center as well as multiple digitized directories. These do not claim to be a complete collection of all reverse listing city directories produced.

ERIS has made every effort to provide accurate and complete information but shall not be held liable for missing, incomplete or inaccurate information. To complete this search we used the general range(s) below to search for relevant findings. If you believe there are additional addresses or streets that require searching please contact us at 866-517-5204.

Search Criteria:

ALL of Castro Ave
900-1200 of Francisco Blvd E

Search Notes:

Notice: IMPORTANT LIMITATIONS and YOUR LIABILITY

Reliance on information in Report: This report DOES NOT replace a full Phase I Environmental Site Assessment but is solely intended to be used as database review of environmental records.

License for use of information in Report: No page of this report can be used without this cover page, this notice and the project property identifier. The information in Report(s) may not be modified or re-sold.

Your Liability for misuse: Using this Service and/or its reports in a manner contrary to this Notice or your agreement will be in breach of copyright and contract and ERIS may obtain damages for such mis-use, including damages caused to third parties, and gives ERIS the right to terminate your account, rescind your license to any previous reports and to bar you from future use of the Service.

No warranty of Accuracy or Liability for ERIS: The information contained in this report has been produced by ERIS Information Inc. ("ERIS") using various sources of information, including information provided by Federal and State government departments. The report applies only to the address and up to the date specified on the cover of this report, and any alterations or deviation from this description will require a new report. This report and the data contained herein does not purport to be and does not constitute a guarantee of the accuracy of the information contained herein and does not constitute a legal opinion nor medical advice. Although ERIS has endeavored to present you with information that is accurate, ERIS disclaims, any and all liability for any errors, omissions, or inaccuracies in such information and data, whether attributable to inadvertence, negligence or otherwise, and for any consequences arising therefrom. Liability on the part of ERIS is limited to the monetary value paid for this report.

Trademark and Copyright: You may not use the ERIS trademarks or attribute any work to ERIS other than as outlined above. This Service and Report(s) are protected by copyright owned by ERIS Information Inc. Copyright in data used in the Service or Report(s) (the "Data") is owned by ERIS or its licensors. The Service, Report(s) and Data may not be copied or reproduced in whole or in any substantial part without prior written consent of ERIS.

Executive Summary

Property Information:

Project Property: *Marin Transit Property Evaluation
1075 Francisco Blvd E San Rafael CA 94901*

Project No: *17-362.9*

Coordinates:

Latitude:	<i>37.95920056</i>
Longitude:	<i>-122.50295862</i>
UTM Northing:	<i>4,201,404.75</i>
UTM Easting:	<i>543,663.21</i>
UTM Zone:	<i>UTM Zone 10S</i>

Elevation: *5 FT*

Order Information:

Order No: *24072600476*

Date Requested: *July 26, 2024*

Requested by: *Crawford & Associates, Inc.*

Report Type: *Database Report*
